Here follows a list of errata in the script Computability, CS_226. All mistakes have been changed in the lecture notes available on the Internet.

Section 2: Encoding of Data Types into $\mathbb{N}$

- Slide 2-41: On this and the next slides, variables should be enumerated $x_0, \ldots, x_{n-1}$ instead of $x_1, \ldots, x_n$, i.e.
  - On Slide 2-41, replace $\forall x_1, \ldots, x_n \in \mathbb{N} . \varphi(x_1, \ldots, x_n)$ by $\forall x_0, \ldots, x_{n-1} \in \mathbb{N} . \varphi(x_0, \ldots, x_{n-1})$.
  - On Slide 2-42 replace
    * $\{(x_1, \ldots, x_n) \in \mathbb{N}^n | \varphi(x_1, \ldots, x_n)\}$ by $\{(x_0, \ldots, x_{n-1}) \in \mathbb{N}^n | \varphi(x_0, \ldots, x_{n-1})\}$
    * $\{(x_1, \ldots, x_n, y, z) \in \mathbb{N}^n | \varphi(x_1, \ldots, x_n, y, z)\}$ is to be replaced by $\{(x_0, \ldots, x_{n-3}, y, z) \in \mathbb{N}^n | \varphi(x_1, \ldots, x_{n-3}, y, z)\}$.
      Note that we have to use $x_{n-3}$ since there are only $n$ variables in total.
